# MISSION & VISION

We understand the business flow to help develop a scalable product. This helps us to build a strategy and technical documents to ensure all parties are aligned with the scope and a roadmap to achieve defined objectives to streamline operations by automating business process. This includes and not limited to choosing the right tech that is robust and dynamic to future changes.

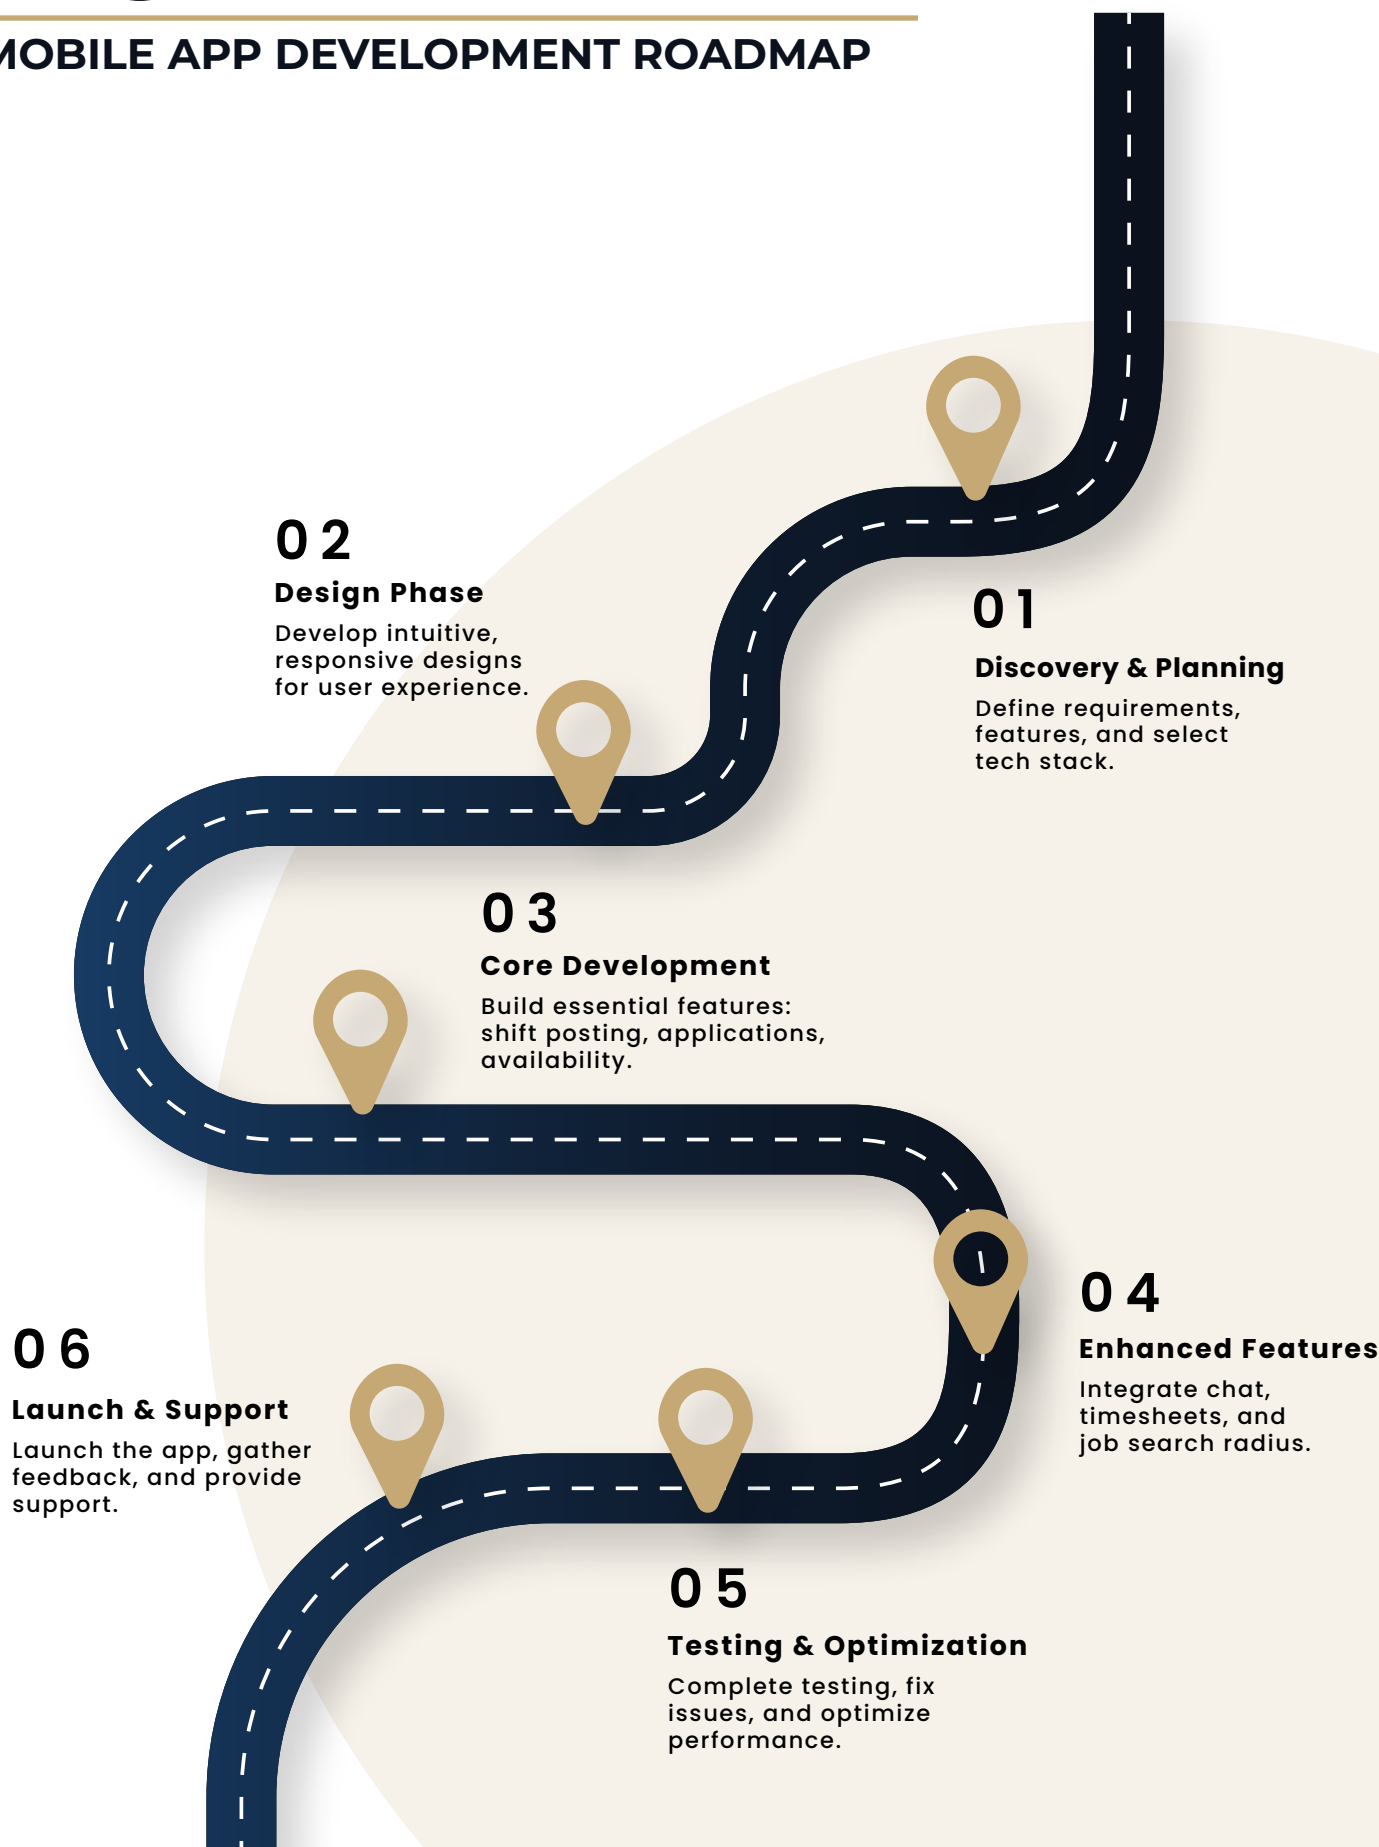

We showcase our projects and capabilities to go an extra mile to bring value in the project and make each project unique.

# ROADMAP

## MOBILE APP DEVELOPMENT ROADMAP

## Nexime Healthcare

2023 – 2024

### MOBILE APP SOFTWARE

For Nexime, we developed a solution with features like shift management, real-time availability tracking, and automated scheduling. We enhanced user experience with an intuitive interface and added compliance and document management tools, making daily operations smoother and more efficient.

### Made with

## Alpha-One Plus

2023 – 2024

### MOBILE APP SOFTWARE

For Alpha-One Plus, a security agency providing guards in Glasgow, we developed a solution with Live Jobs for real-time job assignments, rota management, payroll management, and a panic button for quick support. Along with these, we included compliance tracking and document management to ensure regulatory standards, making daily operations more efficient and responsive.

### Made with

## FRA Wizard

2023 – 2024

### MOBILE APP SOFTWARE

For FRA Wizard, we developed a specialized 2D Floor Planning Tool tailored for Fire Risk Assessments. It includes intuitive drag-and-drop functionality, precise resizing options, and a comprehensive set of fire symbols, enabling users to create accurate layouts and mark essential fire safety elements with ease. This tool streamlines the assessment process, making it simple to visualize and document fire safety plans effectively.

### Made with:

## Metro-PAT

2023 – 2024

### MOBILE APP SOFTWARE

For Metropat, we developed a custom software solution featuring a job management page that closely mirrored their previous Excel setup, which they had relied on for over 20 years, making the transition seamless. Key features included automated scheduling, data management tools, document handling, and compliance tracking, all designed to enhance scalability and efficiency. These additions allowed Metropat to automate routine tasks, reduce administrative workload, and streamline daily operations, enabling the team to manage an increased volume of work with ease.

### Made with:

# Our Project

## BOSSeats

2023 - 2024

### MOBILE APP SOFTWARE

BOSSeats crafts custom ordering and marketing solution like Apps and Websites for direct, commission-free orders, enhancing community connections and boosting your profits.

## Made with:

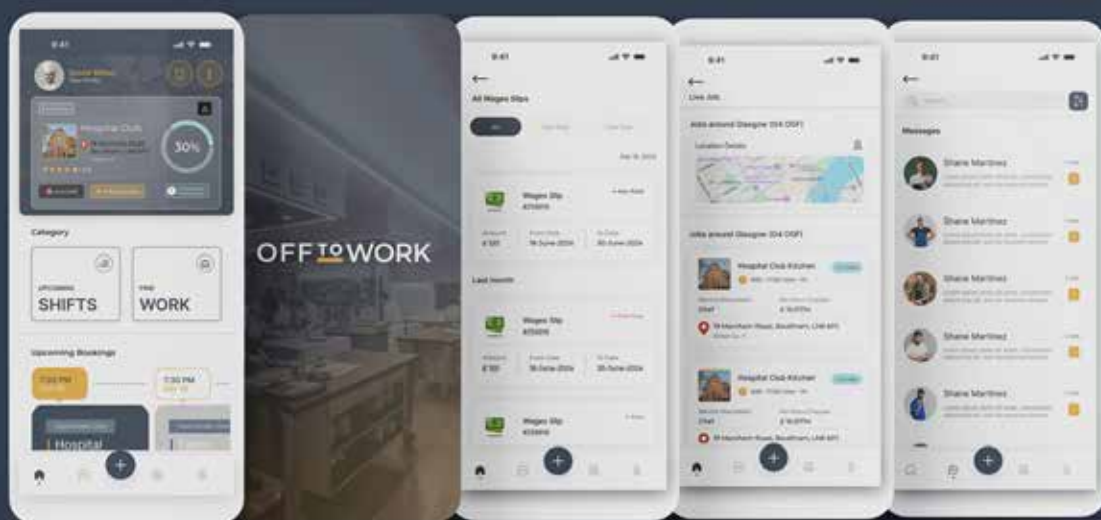

## CASE STUDY: BOSSeats

"After just three months with BOSSeats, we've dramatically shifted our sales from third-party platforms to direct orders, boosting our profits by 30%. This transition has reinvigorated our customer connections and given us full control over our business operations."

Dora Phillip

14 May 2025

I couldn't be happier with the mobile application development work from GreatBritain.tech. They took my idea and turned it into a fully functional app that's now live in the app store. From wireframes to deployment, they handled it all seamlessly.

Olivia David

23 April 2025

We at MedEquip Solutions struggled immensely with manual invoicing and inventory management. GreatBritain. Tech developed a bespoke automation system for us, drastically reducing errors and saving our admin team hours every day. We strongly recommend them to any business looking to automate complex administrative tasks.

Thomas Jack

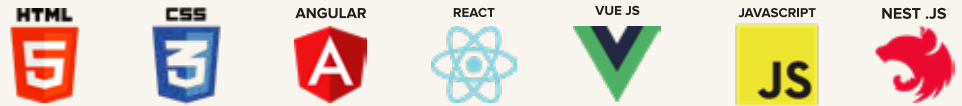

We approached them with a vision for a custom-built digital marketing app to support our business operations. What we received was far beyond expectations—a seamlessly designed, highly intuitive product developed using the best mobile app development platform available. Their commitment to quality app UI, robust mobile application software, and user-centric design was evident at every stage.
